

Jupiter8

A CURATED GROUPSHOW FOR COLLECTIBLE

The Millen House presents JUPITER8. Expanding on last years exhibition, this new edition translates the bold sonic landscapes of the 1980s Jupiter-8 synthesizer into a tactile, immersive environment.

Blending natural forms with extraterrestrial designs, our show JUPITER8 juxtaposes sculptural pieces like the bright orange FLORIS chair with earthy materials such as wood, marble, silk and high-tech elements like thin carbon fibers and aluminium. This dynamic interplay bridges organic evolution with technological imagination.

A curated selection of 20th and 21st century collectible design that blurs the lines between past and future, the earthly and the extraterrestrial.

JUPITER8 transforms the energy of futuristic sound into a living composition of contemporary art and design.
